Scope vs Specialization Chart (SVSC)

Inspired by the ,Feature Team Adoption Map' from Large Scale Scrum (LeSS)

Problem

5

Ownership

System

Whole System

Some Subsystems

One Subsystem

Component

Feature Factories

Narrowed problem view, leading to misunderstood customer needs

Component Teams

High coordination demand,
Ilittle understanding of
customer needs

Product Teams

Systemic view, good understanding of customer needs

Siloed Teams

Focus on local optimization, leading to redundancies and inconsistent user experience

Crossfunctionality of the Teams

Writing Code

Code & Test

Code, Test & Architecture

Code, Test,
Architecture
& Design

Code, Test, Arch., Design & Requirements

How to use it:

In a first step, the Scope vs Specialization Chart can be used for assessments or self assessments to gain clarity on the actual state.

In a second step measures can be taken to move the team towards the upper right.

Assess the result regularly and repeat.
